SCC Health Clinic – Flu Vaccinations

It's likely that flu viruses and the virus that causes COVID-19 will both spread this fall and winter. Healthcare systems could be overwhelmed treating both patients with flu and patients with COVID-19. This means getting a flu vaccine during 2020-2021 is more important than ever.

While getting a flu vaccine will not protect against COVID-19, there are many important benefits, such as:

1. Flu vaccines have been shown to reduce the risk of flu illness, hospitalization, and death.
2. Getting a flu vaccine can also save healthcare resources for the care of patients with COVID-19.

If you have not yet received your flu vaccination this season, please call the **SCC Health Clinic** at **715-478-5180** to schedule an appointment.
